

Call for EMS Lab sessions

The European Association of EMS (EMS Europe) aims to rethink the traditional structure and execution of conference programs. Therefore, we have introduced our new concept EMS Labs, which will form the foundation for the third day of the EMS2025 congress in Stockholm.

This is a call for our EMS Lab session.

We invite you and your team or organization to organize an EMS Lab. The organizing committee of EMS2025 offer you and your team a platform at our EMS Congress.

Selection process: Among the submitted applications, the five best ideas, topics and most relevant workshops will be selected by our EMS Lab committee and faculty. Focus will be on relevance for EMS, patients, EMS providers, and our communities. Priorities include clinical relevance, clear learning objectives, interactivity, and feasibility within the framework.

EMS Labs are mini workshops that practically and interactively cover a topic in only 30 minutes. Each workshop session will have a maximum of 30-50 participants and 2-4 speakers/facilitators. Each workshop session will be repeated 4 times. A total of 5 different EMS Labs will be offered to delegates.

To introduce all the EMS Labs, we will have a 1-hour plenary session on the morning of the third day of the congress with a '**Rapid EMS Fire**' - session. During this session, the speakers of all EMS Labs will make brief presentations (5-7 minutes) covering the core learnings from their EMS Labs. The idea is to introduce all the delegates to all EMS Labs in a plenary session in the morning. After this session delegates can decide which sessions they want to attend. All EMS Labs will be held four times during the day, giving delegates the opportunity to attend more than one EMS Lab.

Your application should include the following: Title, motivation, learning objectives, outline of the content, contact person (name, title and affiliations) and names of additional team members and previous experience as facilitators. Limit your application to maximum two pages. Videos or additional material are welcome.

To apply you must be registered for our congress.

Deadline for application: March 31. 2025

Announcement of selected EMS Labs: April 11. 2025

Please feel free to contact us if you have any questions.
